RELEVANT COURSEWORK

- Operating Systems | Grade: A - Learned computer and network security concepts within academic Linux environment
- Web Development | Grade: A - Gained experience in back-end development, including server-side scripting, database integration, and the use of web frameworks. Used technologies such as react, mssql, mongodb, docker & git.
- Databases | Grade: A - Developed skills in database management, ensuring data integrity and efficient data handling.
- Data Structures & Algorithms | Grade: B - Designed, implemented, and analyzed various data structures such as arrays, linked lists, and trees.

PROJECTS

FureverMatch - Python Flask, MongoDB, Docker, HTML/CSS

- An app that pairs pets with their ideal owners, revolutionizing the adoption process. Designed REST API, and integrated it into MongoDb database. The application was also dockerized and deployed via docker-compose.

Plasticless - React, MongoDB, HTML/CSS

- A shopping app designed for eco-conscious consumers, streamlining the experience by showcasing exclusively plastic-free products. Designed comprehensive CRUD behavior with React on the front end.
