Career Summary

2017 – present Information Technology Technician
Asante Medical System, Medford Oregon.

Role outline

Me and my team's main job is to set up and take care of any equipment that is used at Asante. That includes receiving shipments, unpacking and building equipment, installing necessary software, and deploying it out into the field. We are responsible for maintaining the three different Asante hospitals located in Medford, Ashland, and Grants Pass. The job requires a special set of social skills when working around doctors, nurses, and patients on a day to day basis. The job has required me to have good time management skills in order to balance working and my schooling.
